The Ultimate Way To Play

Built with Strength. Built for FUN!

Glacier Ice Houses are made by a workforce of skilled craftsmen in Minnesota, collectively dedicated to producing the highest quality and most innovative ice houses on the market. Our goal is to build only the highest quality ice fishing houses, constructed of premium materials that will provide lasting value and years of trouble-free service. We know that our ice houses will be subjected to heavy snow loads and endless "melt and freeze" cycles that can cause inferior roofing systems to leak.

That's why all Glacier Ice Houses are constructed with the strongest and most reliable trussed roofing system on the market today. All Glacier Ice Houses feature a weather-sealed, seamless-rubber, trussed roof constructed of 3/8 inch plywood. Once you compare a Glacier Ice House to the competition, we're confident you'll agree that a Glacier Ice House is...

**The Ultimate Way To
Play For All Seasons!**

The Glacier Difference

RADIANT BARRIER WRAP

We're committed to building an ice house that will be warm, comfortable and efficient to heat no matter what Mother Nature throws your way!

HAND CRANK SYSTEM

At Glacier we use a 1¾" strap that carries a 6000 lb capacity that will not rust vs a cable with a 1200 lb capacity.

GLACIER TRUSSED ROOF

Glacier Ice houses are constructed with the strongest and most reliable trussed roofing system on the market today.

FIT AND FINISH

Our goal is to focus on attention to detail, which allows us to create the highest quality ice house on the market.

LED LIGHTING

Compare Glacier's maintenance-free LED interior and exterior lighting to the competition and we're sure you'll agree, a Glacier Ice House is the ultimate way to play for all seasons.

AXLE DESIGN

We engineered a stronger, more resilient trailer chassis capable of handling heavier loads than the competition!

RV WINDOWS

RV-grade windows provide a cleaner, more aesthetically pleasing look and offer a tighter weather seal that significantly improves energy efficiency.

J-CHANNEL TRIM

We know that to build the industry's best ice house, we need to engineer innovative solutions to long-standing design issues that currently plague the competition!

ALL CEDAR INTERIOR

Glacier uses the highest quality Inland Red Cedar from the Eastern slopes of the Rockies in Idaho. All the cedar is kiln-dried to Glacier specs for durability and consistency in the use of the product.

Glacier Series

Standard Features

Cedar Interior (16' & up Models Tongue and Groove standard, 12-14' Models standard with paneled walls)
 Reflective Graphics Package
 Enclosed Battery Box
 Battery Disconnect

Each Glacier is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Glacier prior to leaving our facilities. The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit. All information contained on this website is believed to be accurate at the time of publication. However, during the model year, it may be necessary to make revisions and Glacier LLC reserves the right to make changes without notice, including prices, colors, materials, equipment and specifications as well as the addition of new models and the discontinuance of models shown on this website. Therefore, please call to confirm the existence of any material, design or specifications that are material to your purchase decision.

12 Custom Exterior Colors

At Glacier we offer custom exterior colors to fit every taste, from our luxurious metallic finishes to our bright, eye-popping colors that turn heads. Using premium quality aluminum, our paint resists UV degradation, which prevents chalking and fading in harsh environments. The color charts are for REFERENCE only. Actual metal color samples are available upon request. We reserve the right to make changes without notice.
